

MH Corbin Radial Grounding System

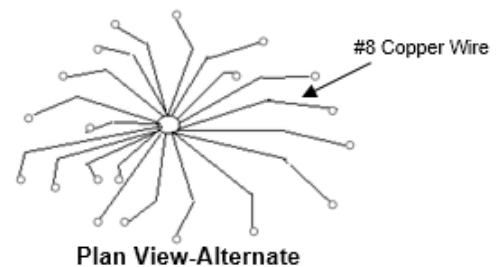

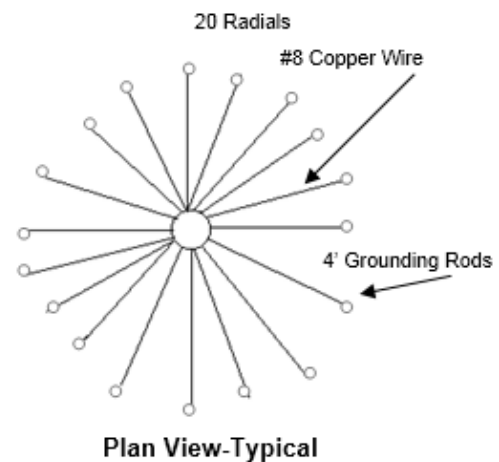

Benefits

- The best grounding system for AM broadcasting
- Can be used with Permanent or portable HAR systems
- Quality, reliable service with no maintenance required

Features

- 4' grounding rods
- 8 gauge grounding wire included

Overview

The MH Corbin Radial Ground is the most effective grounding system for your HAR. Utilizing 20 radials of 8 gauge copper wiring installed with 4' grounding rods, this system ensures the best AM signal propagation.

A wagon wheel type pattern (as shown) is typical. Alternate patterns may be used, as site conditions dictate, provided the combined length of radials equal 2000'
