

BlackMax® HAR Station

HIGHWAY INFORMATION SYSTEMS

UPGRADEABLE AND COMPONENT BASED HIGHWAY ADVISORY RADIO SYSTEMS

The BlackMax HAR Station is the electronic unit for the MH Corbin Highway Advisory Radio (HAR) system. It supports multiple components, allowing you to add or upgrade your HAR without replacing the entire system.

By utilizing the BlackMax HAR Station, Highway Advisory Radio systems can be customized to fit any need and provide motorists with the most up-to-the-minute travel and weather information by broadcasting audio messages directly to any AM radio in a specified range.

The sleek design of the BlackMax HAR Station puts all the controls up front for easy access. The rack mounted component based system lets the user build a unit to suit his or her needs, leaving room to accommodate future modules. Simply remove an old module and install a new one, or add the latest technology – all in just minutes.

MODEL BMX

Platinum Software Compatible

BlackMax® HAR Station

- Modular design provides structure allows upgrades as to build the system with low upfront costs
- Designed for permanent or portable systems
- Electronics housed in a Eurocard cage (19" rack)
- Optional extender card simplifies troubleshooting
- 1 or 5 year warranty options available
- Rugged construction for harsh weather conditions
- Digital or analog communications options

TECHNICAL DATA AT-A-GLANCE

Power Supply DRPSM-PRO		STANDARD	Transmitter DRTXM4		STANDARD
Automatically switches from A/C to D/C when needed Meters power for troubleshooting.			Highest efficiency transmitter available Comprehensive metering on front panel		
Input Power	110VAC to 240VAC, switch selectable		RF Output	0 to 10W as allowed by FCC	
Input Frequency	40 – 60 Hz, switch selectable		Audio Distortion	<1.5% from 200Hz to 3.5kHz	
Output Power	13.6VDC@5A, 10A maximum		FCC Certification	O2Q-DRTMX4	
DR1500 AM Recorder / Player DR1500AM		STANDARD	Transmitter Control Module TCM1*		OPTIONAL
80 min. recording capacity, 999 message slots, 24 playlist Provides monitoring and status capability.			Boost transmitter output by up to 30W.		
Interface, Ports	RS-232, Parallel Port, Analog Handset		Power	110VAC or 10-14VDC	
Digital Communications Controller DCC3		OPTIONAL	GPS Synchronizer Module GPS1		OPTIONAL
Provides Ethernet (TCP/IP) communications, monitoring and status capability for HAR Systems.			Allows for synchronized broadcasts throughout an HAR Network. <i>Platinum Software compatible</i>		
Interface, Ports	RJ45 (2 ea), USB (4 ea) and DB9		Power	10VDC to 14VDC at less than 2A	
Weather Receiver DRWX1		OPTIONAL	Provides up-to-the-minute weather information directly from the National Weather Service.		
Weather Alert	Detects 1050 Hz tone
