

Platinum Control Software

HIGHWAY INFORMATION SYSTEMS

ALL-IN-ONE REMOTE MONITORING SOFTWARE THAT BROADCASTS, RECORDS, & SCHEDULES MESSAGES

MODEL
V2.0 | CLIENT
V1.3 | SERVER

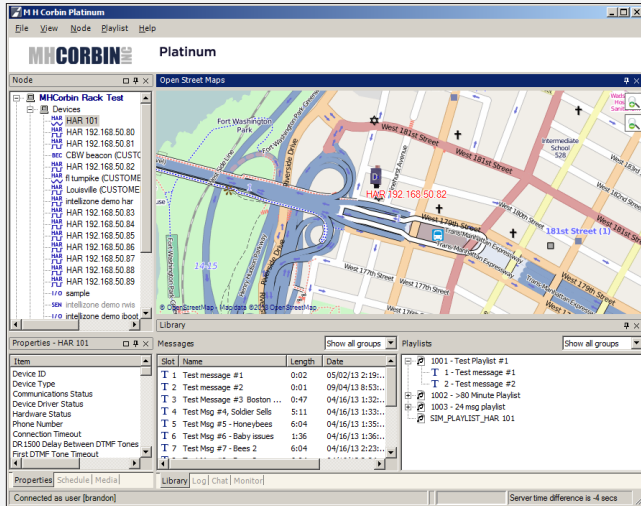

Platinum Control Software provides data management, control, and viewing of transportation equipment. This unique software package allows for full control of Highway Advisory Radios (HARs) by monitoring, creating and changing broadcast messages for every HAR System in your network.

Message recording, editing, review, scheduling and synchronizing are quick and easy through the intuitive graphical user interface. Features include map displays of each HAR system in your network, message library to simplify sending messages to the public, and simple execution of commands for your entire HAR network.

MH CORBIN LLC
Highway Information Systems

Platinum Control Software

- Control one or more devices with a single command
- Support for customized maps and multiple users
- Prioritize and schedule broadcast messages
- Single or recurrent operations are supported
- Powerful Text-To-Speech capability available
